# About Us

Since 2014 Risk Management Resources Limited (RMR) has provided specialist security services tailored to meet the complex needs of individuals and organisations working in challenging circumstances.

Our proven security and risk management services are delivered by our highly skilled team of security consultants. We take pride in offering services that address the unique challenges our customers face, from activism, to crime and terrorism. In partnership with our customers, we develop solutions that empower them to overcome security challenges with confidence, ensuring they can better protect their people, property and reputation.

Our swift and responsive customer management sets us apart. Our dedicated team becomes an extension of our customers meaning our solutions are entirely tailored to the unique way they work and commensurate to the risks they face.

At the heart of our operational ethos lies the integration of the latest security industry insights and best practices with decades of experience in the security industry. We strive for excellence, making us a trusted partner in navigating the complex and ever-evolving landscape of risk management and security.

# Risk Management Services

## 1. Consultancy services

Our team of experts provide solutions that are proportionate and risk-based by working in close collaboration with you to understand your objectives, how you operate and the threats you may face. Our team draws on decades of experience in law enforcement, the military and security industry to review, develop and realize security risk management programmes to build on your organisation's protective measures. From strategy and governance development through to benchmarking and needs assessments our team can provide you with a secure foundation to thrive in today's dynamic business environment.

## 2. Threat Monitoring

To fortify your organisation's defences, we employ a multifaceted approach to monitor threats:

### ▶ Open-Source Threat Monitoring and Analysis

Our team utilises open source intelligence gathering techniques to identify and analyse potential threats, tactics, techniques, and entities that could pose risks to your organisation.

### ▶ Due Diligence Checks

We conduct thorough due diligence checks on employees, stakeholders, and any relevant entities associated with your organisation.

### ▶ Specific Investigations

In cases where specific concerns or incidents arise, including a security breach, suspicious activity, or any other potential threat, our team will employ investigative techniques to gather relevant information.

### 3. Penetration Testing

Our penetration testing aims to uncover any potential weaknesses in your physical security provision before those with malicious intent exploit them.

RMR utilises the following methodologies to carry out penetration tests:

- Passive reconnaissance
- Open source intelligence gathering
- Active reconnaissance
- Covert observation
- Attack planning
- Pretexting
- Infiltration/Exploitation
- Post-exploitation

### 4. Security Strategy

Our services encompass a thorough and contemporary review of your existing security strategy, risk management policies, and implementation methodologies. Following this comprehensive assessment, we will provide you with a detailed report that includes a set of recommendations tailored to your specific needs and circumstances.

Our aim is to enhance your security posture and ensure alignment with the latest industry standards and best practices.

### 5. Embedded Security Advisers

We provide a dedicated and experienced adviser to guide you through security threats and appropriate legal response to those threats.

This can be delivered in a one-off consultation or regular contracted arrangement.

## 6. Site Vulnerability Assessment (commercial or residential)

We identify and address security vulnerabilities that could be exploited by threat actors, thereby safeguarding the interests and wellbeing of organisations and individuals. We provide comprehensive recommendations to manage, mitigate, or eliminate these vulnerabilities.

Our approach involves a meticulous assessment of existing systems at the site(s), coupled with a physical survey of critical assets, infrastructure, and installations. This assessment is underpinned by a thorough vulnerability analysis based on a detailed threat and system review. The outcome is a prioritised set of recommendations designed to enhance security management systems, all derived from the insights gained during the site review.

We use a five-step risk assessment methodology.

- 1 Asset characterisation
- 2 Threat scoping and analysis
- 3 Vulnerability review
- 4 Consequence analysis (health/safety, economic, infrastructure/operations, governance)
- 5 Risk ranking and gap closure recommendations

# Specialist Services and Training

## Dealing with Incursion Protest and Activism

We have developed specialised services in all critical aspects of protester management, including knowledge of the legal framework and rights of protestors, safe intervention strategies, conflict resolution techniques, and ground-level technical intervention for protest removal.

- ▶▶ Our teams are ready to be deployed swiftly in response to events, or
- ▶▶ Can serve as a proactive addition to your existing security solution.

Our services are a cost-effective solution for addressing unlawful events that may impact your business. By having a dedicated team equipped to manage these scenarios, you can mitigate risks and ensure the safety and security of your organisation.

## Specialist Training

### ▶▶ Dealing with Incursion Protest and Activism Course (DWIPA) | CPD UK Certified

We offer customised online and in-person DWIPA training, enhancing your staff's abilities to address unlawful protests or incursions safely, lawfully, and with consideration for everyone involved.

### ▶▶ Technical Intervention to Protest

We empower participants with expertise in advanced tools and techniques such as: surveillance systems, crowd monitoring software, communication tools, and more. Learn the technical skills needed to maintain safety and control during protests.
